Customer Referrals

At LabLynx, it's our mission to provide you with a complete laboratory software solution suited to the demands of your unique lab, regardless of size or industry. From discovering your needs to delivering a customizable and configurable LIMS solution, we make sure that your experience with us is the perfect combination of quality, functionality, and service.

Don't just take our word for it

Discover what some of our clients have to say about their experience with LabLynx.

"At LabLynx, the customer always comes first and their loyalty and dedication to ensuring our system is running exactly as we want with the functionality we desire is unmatched. Their service and support is outstanding. There may be other competitors who can sell you a LIMS product, but no one else can provide or live up to the level of service LabLynx provides."

Stacie A - Director of IT Services

"LabLynx helped us unravel our database tables and merge the information into LIMS. They customized our LIMS system while I sat back with my feet up! Both the cost to implement and support our LIMS is excellent compared to other providers. The staff is always willing to help, and I would recommend LabLynx to any other Lab considering installing a LIMS."

Justin L. - Lab Manager

"One thing I love about LabLynx is that if I tell them I have a little idea, they are open to it, and then they work to make it happen. LabLynx worked with me day in and day out testing each individual location in the system to make sure everything worked, and if something didn't work, LabLynx would go back to the drawing table and fix it."

Rachael C. - Strategy Officer

"One of the biggest things I can say about LabLynx and working with them is that they were very responsive. One of the main reasons that we were able to get the lab set up so quickly is because they were really focusing on it. The responsiveness was there, and the customer care was there. It wasn't like we were just setting out on our own."

Jarrod S. - Data & Application Manager

"We were evaluating multiple vendors when we came across LabLynx. Their team was the most open to the idea of getting us what we needed, rather than trying to just sell us a stock product and telling us to deal with it. That got us started off on the right foot with LabLynx."

Michael S. - VP of Business Intelligence

"Our LabLynx LIMS allows us to organize and track our work in a way that avoids lost or swapped samples and maintain our published turnaround times. You are only as good as your last performance, so accuracy and timeliness is critical to our survival and continued success in the industry. Very important decisions regarding very expensive assets are being made based on our results, so we cannot afford to fail.

You can't beat LabLynx for the value, the custom configuration, and the ability for us to streamline the order entry process and the whole reporting process. We figure we save at least two head count through efficiencies gained from organizing our work within LIMS, as well as reporting automation. We estimate we are saving anywhere from $130K to $200K per year."

Sam P. - President
